SOURCE [REDACTED]

1. The Dynamo Electric Motor Plant (Vaci ut 40/E, Budapest) produces a daily average of 160 to 180 electric motors of 1 1/2 hp. or smaller. The new norm for the assembly of these motors is 10 man-minutes each. Approximately 80% of this production is shipped to the USSR. For the most part, the materials used in the manufacture of 1 1/2 hp. motors come from Czechoslovakia, although some are of Russian origin. Few of the raw materials are produced in Hungary. Czech ball bearings have to be discarded after test runs. In cases where Hungarian bearings are used, it has been found that approximately 50% have manufacturing defects and cannot be used.
2. During the summer of 1950 the Dynamo Plant received third-rate ball bearings from the Steyr plant in Austria. Some Swedish ball bearings were received through Soviet sources.
3. The norm for the assembly of a drilling and grinding machine (Fúró-Maró-Gép) including frame and motor is four man-hours.

This document is hereby regraded to CONFIDENTIAL in accordance with the letter of 16 October 1978 from the Director of Central Intelligence to the Archivist of the United States.
